### **REASONS FOR ALLOWANCE**

The following is an examiner's statement of reasons for allowance:

Applicant's arguments, see Remarks, filed 27 May 2004, with respect to Nicholson et al. (United States Patent No. 5,268,001) have been fully considered and are persuasive. The rejection of claims 1-4, 8, 10, 11, 18, 26-29, 31, and 33 has been withdrawn.

Regarding the rejections of the claims as being obvious over Aker in view of Nicholson, a closer review of Aker show that Aker teaches away from the proposed combination. Though Aker discloses a sleeve formed of a material having a low modulus of elasticity for absorbing masticatory loads, Aker clearly states that this material is such that it does not cause deformation of the sleeve (see col.1, lines 20-24 and col. 2, lines 15-17). Since Aker does not want the sleeve to undergo deformation, one skilled in the art would not make it expandable (deformable) upon insertion of the implant, as set forth by applicant's claims.

The other closest prior art to applicant's claimed invention are Anders (United States Patent No. 5,492,470) and Story (United States Patent No. 6,431,868) which show dental implants with polymer sheaths for absorbing masticatory loads, however these sheaths are attached to the implant at manufacture and thus the sheath is not expandable upon insertion of the implant as set forth in applicant's claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
